You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

- **Type:** Knock-in Reverse Convertible Certificate in Euro.
- **Term:** 24/03/2025
- **Objectives:**

The product offers the total protection of the Notional Amount per Securities under the occurrence of certain conditions, therefore the investor might incur in a capital loss of 100 per cent. of the Notional Amount.

This product is linked to the performance of the Reference Underlying and is designed to correspond, to the occurrence of certain conditions: i) at maturity date, a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities and, ii) on specific dates, an unconditional remuneration, unless automatic early redemption Event occurs.

In particular, on the Settlement Date, the product will correspond a redemption amount as determined on the Settlement Valuation Date as follows:

- a) if the worst Performance of the Underlying Reference is greater than or equal to the Barrier Level, investors will receive a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities;
- b) if the worst Performance of the Underlying Reference is less than the Barrier Level, investors will receive a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities multiplied by the worst Performance of the Underlying Reference. In this case, investors would incur in a partial or total loss of the amount invested.

The product pays, in addition, an Unconditional Remuneration, on the relevant Unconditional Remuneration Payment Date.

If an Automatic Early Settlement Event occurs, the product expires and will be early redeemed and investors will receive, on the relevant Automatic Early Settlement Date, a redemption amount equal to 100 per cent. of Notional Amount per Securities. If an Automatic Early Settlement Event occurs, the product early redeems and no other payments will be corresponded to the investors.

- The stress scenario shows what you might get back in extreme market circumstances.

What happens if the issuer is unable to pay out?

Should Mediobanca International (Luxembourg) S.A. default or file for bankruptcy, investors have the right to seek payment from Mediobanca – Banca di Credito Finanziario S.p.A. of all amount due pursuant to a direct, unconditional, unsubordinated and unsecured guarantee. The product is not covered by any statutory investor compensation or guarantee scheme. Should Mediobanca - Banca di Credito Finanziario S.p.A default or file for bankruptcy, the investors may then lose all their investment. The product is not covered by the guarantee of the Italian Bank Deposit Protection Fund (Fondo Interbancario di Tutela dei Depositi). Both Mediobanca International (Luxembourg) S.A., the Issuer, and Mediobanca - Banca di Credito Finanziario S.p.A., the Guarantor, are licensed as credit institution respectively in Luxembourg and in Italy and, as such, are subject to the resolution regime introduced by the EU Bank Recovery and Resolution Directive n. 59 of 15 May 2014 as implemented in Luxembourg and in Italy (the "BRRD"). As a result of the implementation of BRRD, investors may be subject to write-down, with the possibility of the nominal value of the financial instruments and the guarantee being cancelled, or conversion into equity on any application of the bail-in tool. Therefore, through the exercise of any power under the BRRD, investors may suffer the write-down, cancellation or conversion into equity, on a permanent basis, of their investment, even if there is no formal declaration of insolvency by the Issuer and/or the Guarantor.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods. The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). We have assumed:

- that 10000 EUR is invested;
- that the performance of the product is consistent with each holding period shown.

During the subscription period, product costs are calculated as the difference between the issue price and the fair value of the product. The fair value of the product is calculated on the basis of the market values or, if not available, on the basis of the value of financial instruments with similar characteristics, or, in their absence, from estimates made using mathematical models. After the Issue Date, product costs are half the difference between the bid price (i.e. the price at which the liquidity provider is willing to repurchase the product) and the ask price (i.e. the price at which the liquidity provider is willing to sell it).

	If the product is called at the first possible date	If the product reaches maturity
Total costs	€ 50	€ 50
Cost impact (*)	0.5 %	0.5 %

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

Composition of costs

One-off costs upon entry or exit		At maturity
Entry costs	The manufacturer does not charge entry costs, but in case of a secondary market purchase, the purchase price would include an implicit cost equal to half the difference between the bid and ask price.	€ 50
Exit costs	The manufacturer does not charge exit costs, but in case of disinvestment before maturity, the selling price on the secondary market would include an implicit cost equal to half the difference between the bid and ask price.	€ 0
Ongoing costs		
Management fees and other administrative or operating costs	0% of the value of your investment per year. This is an estimate based on actual costs over the last year.	€ 0
Transaction costs	0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product.	€ 0

How long should I hold it and can I take money out early?
